

Online Employee Training Courses

Provided by [Sentrient](#)

We are pleased to be able to share with everyone in our network training resources which are accessible for free, whether this is one person, a small business without a Learning Management System (LMS) or a larger organisation who already have an LMS.

The information and below links for individuals and businesses can be shared with as many people as you feel you can help. You will notice that the link for individuals takes them straight to the course, versus the link for businesses which goes to a download page for the SCORM package.

Individuals wanting to access this training as general awareness are able to complete the courses online from these links:

[Infection Prevention and Control](#)
[Working from Home](#)

Businesses wanting to enrol their staff in these training courses can either download the course as a SCORM package or ask their staff to access individually (above links). Links to download and run on your LMS are:

[Infection Prevention and Control](#)
[Working from Home](#)
